

Measurements required for lighting system for 3 point linkage & trailed equipment - agricultural

A - Overall Width

B - Distance between socket & rear of machine.

ALLOW FOR 'THREADING' ROUND HOPPERS / CHASSIS ETC
IT'S EASIER TO LOSE A METER THAN GAIN 1/2 METER

C - Length of trailed unit excl drawbar

D - Overall working width - are work lamps required?
Please indicate where work lamps are to be fitted and
advise distance from rear of machine, this will determine
what work lamps are required - beam pattern
